CERTIFICATION FOR EXPORT TO IRAN

SGS

CERTIFICATION FOR EXPORT TO IRAN

OUR PROFICIENCY

SGS is the global leader in the area of goods inspection and certification. Our extensive range of services includes the inspection and certification of goods that are to be exported to Iran and are subject to compulsory certification. We handle any necessary export controls worldwide for you in accordance with the requirements of the Central Bank of Iran (Bank Markazi), the INSO (Iranian National Standards Organization) and the Ministry of Health (MoH).

These include

- Certification in compliance (COI/COC) with INSO (former ISIRI) standards
- Pre-shipment inspections (PSI) in accordance to letter of credit
- Good manufacturing practice (GMP) audit services
- Visual free sales certificate (FSC) approval service
- Price verification

SGS receives the inspection application, which describes the goods and the scope of testing, from the Iranian importer. As soon as you send us a proforma invoice and the inspection documents, we agree an inspection date with you along with any other documentation that is required. After determination that the goods comply with the existing documents and with Iranian standards, we issue the certificates you need for import or for submission to the bank.

OUR SERVICE

- You receive a certificate acceptable to the bank (a certificate authenticated by the German Chamber of Industry and Commerce if required) that complies with the conditions of your documentary credit as well as the decree of the Central Bank of Iran (Bank Markazi).
- We provide support for your projects, from the kick-off meeting through to the shipment of the goods or their arrival at the construction site.
- We are happy to advise you on all matters involving export and import to and from Iran – across sectors, for industry, production facilities, trade, and banks.

IF YOU ARE EXPORTING AND TRADING WITH OTHER COUNTRIES, COUNT ON THE STRONGEST PARTNER – SGS.
